Consent: I am the owner, or the authorized agent for the owner, of the animal described on this form, and I have the authority to execute this consent. I hereby give AARC/Joplin Humane Society Spay and Neuter Clinic, and any authorized agents, staff, or representatives consent and authority to perform spay/neuter surgery and administer or dispense medications & vaccines requested on this form. The spay/neuter surgery, which requires general anesthesia, involves the removal of the uterus and ovaries in females and removal of the testicles in males. I understand what will be done. I also understand that my pet will not be checked for pregnancy prior to surgery and that, if pregnant, fetuses will be aborted. I have been informed that there are certain risks and complications associated with any operation or procedure of this type. I have read "Potential Complications from Spay/Neuter Surgery," "Post-Operative Care Instructions," and "Vaccination Reactions." My questions, if any, have been answered. I further understand that during the course of the operations or procedures, unforeseen conditions may arise that may necessitate the performance of additional procedures. I authorize the use of appropriate anesthesia and pain relief medication as needed before or after the procedure. I have been informed that there are risks associated with the use of any medication. I understand that the veterinarian performs all surgeries and utilizes clinic support personnel as deemed necessary. I understand that I am financially responsible for all post-operative veterinary care whether it is provided by AARC/Joplin Humane Society or another veterinary facility. Pets with live fleas at time of surgery will be given Capstar and a \$5 fee will be added to bill. I agree to pick up my pet before closing time or I will pay \$20 per 15 minute interval until I arrive in order to compensate tired staff. Pre-Operative Blood Tests Are Recommended
